ent nationalities of that city, and round that the malady was most frequent among the German population, notorious for consuming uncooked vegeta-bles in large quantities. Of course scientific proofs are wanting to sub-stantiate the theory, and that vegetable eaters in Buffalo are more subject to cancer than the rest of its citizens may be nothing more than a coincidence. Nevertheless, if such were found to be the case in other parts of the world, a strong a priori argument would be established that there is a deelded relationship between cancer and uncleanly raw vegetables.

Baidly, this is the way these men will work. The Chittagong beaters must surround the herd stealthily, each of the two parties making a wide, semicircular detour, dropping two men every 50 feet. When the divisions meet beyond the game there will be a ring, round about, of coolies posted within shouting distance of each other. It is the duty of this ring to hem the herd in for days by gunfire, and gongbeating and flames at night. Meanwhile, a great log stockade is to be built. Then the wild herd is to be driven into it, with how much craft and chance of failure only an elephant ist, has a Norwegian maid who is catcher knows. Once in the game is
